ABOUT THE COMPANY

Bionic Engineers is a digital service provider that aims to provide software, designing and marketing solutions to individuals and businesses. we believe that service and quality is the key to success

We provide all kinds of technological and designing solutions from Billing Software to Web Designs or any custom demand that you may have. Experience the service like none other!

Some of our services include:

Development - We develop responsive, functional and super-fast websites.

We keep User Experience in mind while creating websites. A website should load quickly and should be accessible even on a small view-port and slow internet connection.

Mobile Application - We offer a wide range of professional Android, iOS & Hybrid app development services for our global clients, from a start up to a large enterprise.

Design - We offer professional Graphic design, Brochure design & Logo design. We are experts in crafting visual content to convey the right message to the customers.

Consultancy - We are here to provide you with expert advice on your design and development requirement.

Videos - We create a polished professional video that impresses your audience.

OVERVIEW OF THE PROJECT

Project Name: CUSTOM RESUME GENERATOR

Team Members: Madhuri V

Manjula S

Prerana Hiremath

This project is based on Web Development And its Applications. The main objective of this project is to learn the implementation of HTML, CSS and JavaScript. The basic webpage of this project is created using HTML and styling of the webpage is done using CSS. Javascript is used for the backend for storing all the details typed by the users.

The project is to create a website which is all about CUSTOM RESUME GENERATOR.

An online resume builder is a software developed to simplify the task of creating a resume for individuals. The application provides an effective means of designing desired resume in fact a professional looking resume. The system is flexible to be used and reduces the need of thinking and designing an appropriate resume according to qualifications.

Usually individuals get confused while creating a resume especially for a novice person such as graduate students. They don't get a clear idea of what things and information must be included in a resume. Hence the system is developed to provide them an easy way for creating a professional looking resume. This project is user-friendly and requires minimum human intervention. Individuals just have to fill up a form that specifies questions from all required fields such as personal questions, educational, qualities, interest, skills and so on. The answers provided by the users are stored and the system automatically generates a well structured resume. Users have option to create resume in any format and file.

CUSTOM RESUME GENERATOR

INTRODUCTION

A resume is a formal document that provides an overview of your professional qualifications, including your relevant work experience, skills, education, and notable accomplishments. Usually paired with a cover letter, a resume helps you demonstrate your abilities and convince employers you're qualified and hireable. Your resume, along with a cover letter, is an essential part of the hiring process, and is a base requirement to be considered for a position.

A good resume is the first part of your application any hiring manager will see, so it's important that it conveys your qualifications accurately and convincingly.

Your resume should offer employers a digestible overview of your relevant skills, employment history, education background, and accomplishments. Based on this information, they can make an informed decision about whether or not they want to interview or hire you.

But writing a resume from scratch can be time-consuming. To simplify the process, try using our online resume builder. Just type in your information and our software will help you assemble a perfectly formatted resume that is sure to impress any hiring manager.

The spelling of "résumé" actually originates from French, and means "summary." To this day, the purpose of a resume is still to provide employers with a summary of your relevant qualifications.

If you're applying for a job, you need at least a resume to be considered for the position.

On a base level, a resume is made up of the following five parts:

Contact details

Introduction

Educational background

Work history

Relevant skills

The Purpose of a Resume :

Image of a female hiring manager assessing the resumes of two job seekers.

The goal of any good resume is to get you a formal interview.

Many job seekers assume that the purpose of a resume is to provide a full overview of their professional history. Instead, the goal of your resume is to convince employers you're worth interviewing. To that end, your resume is a valuable tool you can use to highlight your experience to prospective employers.

TOOLS USED

Software Requirements :

- Visual Studio Code 2019.
- Google Chrome or Microsoft Edge of latest version.
- Front End: HTML, CSS, JavaScript, Bootstrap.
- Linux 7.1 or Windows XP/7/8/10 OS or Mac OS

Hardware Requirements :

- Pentium 200-MHz computer with a minimum of 64 MB of RAM (128 MB of RAM recommended).
- Monitor with a refresh rate of at least 40Hz for a smooth GUI experience (optional).
